

## Asphalt, Concrete & Aggregates Class

On January 31, NCAA held its first Introductory Class for Asphalt, Concrete, and Aggregates to an overflow room. The class was designed for personnel that didn't need to attend NCDOT certification classes but needed a basic understanding of NCDOT standards and sampling for our products and the impact that our materials have on asphalt and concrete.

Thanks to Sam Johnson with Martin Marietta, Berry Hall with Blythe Construction, and Eric Misenheimer with Chandler Concrete for providing informative presentations.

Sam Johnson (Martin Marietta) speaking to the attendees about NCDOT sampling.

Eric Misenheimer (Chandler Concrete) speaking to the attendees about aggregates impact on concrete mix designs.
