Ovarian Cancer in Multicultural Communities

Ovarian Cancer is a silent killer. 80% of women with the disease are diagnosed after it has already spread¹. African American women are more likely to die of ovarian cancer than their white counterparts². There is no reliable early detection test for ovarian cancer.

Join us for an important morning of information that could **save your life**. Learn the signs and symptoms of ovarian cancer you need to know.

Saturday August 9, 2025

10am-12pm

Longwood Library

800 Middle Country Rd., Middle Island, NY 11953
