

## Community Sand/Salt available

Menominee County Highway Department reminds the public that we have a community SAND/SALT pile that is free to residents.

Please bring your own containers right to the highway shop and fill them up on your own. Please LIMIT amount to 2 5-gallon pails, as we would like to be able to provide this service to everyone.

REMINDER: nobody, other than Menominee County Highway personnel are allowed in our Salt Shed. We have seen a few people come and load up SALT. This is not a service that we offer. Please only take from the Sand/Salt pile.

If you have any questions, or need assistance, please call the office at 715-799-3369.

# SALT vs. SAND

- Melts snow and ice when temps are below freezing
- Loses effectiveness as temps drop
- Keeps snow "workable" so it is easier to remove

- Increases traction
- Used in extreme cold when salt is less effective
- Primarily used at intersections and ramps
