

# NEW! Associate of Arts & Sciences: Geoscience

## *About:*

- the study of the earth – atmosphere, oceans, lakes, rivers, soils, and glaciers
- understanding the world and its processes in a large time and place scales
- allows insight into 3D processes through time and space that have helped make this place as Menominee ancestral lands, and the changes it has gone through and will continue to go through as climate changes in the modern geologic epoch of the Anthropocene

## *Graduates can:*

- transfer to a 4-year program such as the UW Department of Geoscience
- find employment
  - in forestry, environmental services, hydrology, and in tribal, county, state or federal agencies concerned with soil, water, conservation, wildlife, fisheries, and more

*Apply:* [www.menominee.edu](http://www.menominee.edu)
