

# Stained Glass

## Lead Came Method

We call lead came the "Technique of Professionals". When someone comes into the store for a commission window, we'll frequently be building it in lead came. Now, you can expand your glass skills and learn this centuries-old technique.

***PLEASE VISIT THE STORE WELL IN ADVANCE OF CLASS TO HAVE YOUR PATTERN APPROVED AND TO CHOOSE YOUR GLASS.***

- Your pattern needs to be pre- approved (pattern needs to be appropriate for lead)
- Glass needs to be cut & fitted before class begins (use lead shears to cut the pattern)
- Remove sticky-back paper and number each piece of glass
- In week one, bring your pattern, glass and a plywood building board to class (your plywood needs to be FLAT, at least  $\frac{1}{2}$ " thick and 2" larger than the design)
- Also bring a SHARPIE PEN and SMALL TERRY TOWEL
- In week two, bring soldering tools and wear work clothes and shoes. You will get dirty.

***Always wear safety glasses & closed-toe shoes to class.***

We appreciate it when you buy your tools and supplies here at Harmony. By doing so, you help ensure that your local stained glass store will be here as a place for fun and learning for many years to come.
