Helping you succeed is our goal!

MYCRONIC

axxon

MYCRONIC

Mycronic 4.0 is a complete, agile manufacturing solution that masters the complexity of modern electronics production.

- Best in Class Placement, delivering precision and flexibility in a fast, small and smart format. Award winning Agilis feeders
- Electrical verification, smart software for inventory control
- Jet Printers. High speed, Stencil free. Take complete control of volume, shape and position on each pad.
- Stencil Printers with leading edge accuracy and repeatability
- Towers for component storage & retrieval, smart traceability!
- 3D AOI auto matchmaking, AI algorithm machine learning.
- SPI zero defect process, auto programming
- The richest SMT software suite in the INDUSTRY

www.mycronic.com

- Dispensing: Cost effective, high performance Inline & benchtop
- Conformal Coating: High performance, compact and benchtop
- Conformal Coat automated inspection and Curing systems
- Standardized or Customized for your unique process

www.axxonauto.com/en/

Batch defluxing systems, cleanliness testers and stencil cleaners

- Fully programmable closed loop, ZERO discharge & low discharge batch aqueous cleaning and defluxing systems
- Ultrasonic stencil cleaners and close loop water treatment
- Zero Ion cleanliness tester

www.aqueoustech.com

Leading provider of selective soldering systems

- Standalone, in-line, ultra flexible modular selective soldering systems.
- Simple elegance entry level single point to multi-platform quick load twin PCB rotary table selective systems.
- High speed with large PCB capabilities
- World class training facility with free lifetime training
- Complimentary integrated Nitrogen generating systems.

Seica

The most complete flying probe test available

- Optimize single and double side simultaneously
- Manual or fully automatic loading for facility customization
- EV Battery test systems, nearly 4800 battery cells per minute
- Automated laser inspection and thermal scan integration

www.seica.com

Global leader in X-ray systems & circuit board rework

- X-ray based component counting.
- No programming / capable of being fully automatic
- X-ray inspection machines
- Cost efficient manual and fully automated inspection
- Largest installed base of circuit board rework in the world

www.vjelectronix.com

Smartest profiler on the planet & intelligent dry storage

- Expertise in thermal monitoring and analysis technology.
- Designed for reflow, wave, vapor phase & rework processes.
- Dry cabinet for moisture sensitive devices. Market leading recovery time of less than three minutes.
- Intelligent dry storage, technology is industry 4.0 ready

www.ecd.com

ASK US ABOUT

NANOFLOWX: The better alternative to conformal coatings

- Dip and heat cure solution / No Masking required
- 360 Degree / 4-Side protection (Including connectors)
- No Thermal insulation issues
- Allows Re-workability
- Worlds 1st weatherized EMF/EMI shielding

www.nanoflowx.com

Providing 3D material solutions for the engineering world

- Multi-layer, multi-material digital printing: Silver conductive inks, dielectric insulating inks, 3D structural building inks
- Nanocomposite photopolymers for exponential strength
- High impact, tensile ridged, flexible, long term durability

www.chemcubed.com

World leader in solder recovery (lead and lead free)

- Recovers 60-80% of pure solder from dross.
- Rapid ROI in months
- ISO14001 (gain or retain) recycle-reduce-reuse
- Reduce maintenance times, no oils or chemicals

www.solderrecovery.com

Automated pcb routers

- Sayaka table-top and fully automated in-line routers
- Ultrasonic nozzle & wiper roll cleaner,

www.seikausa.com

FKN Systek

FKN provides effective ways to depanelize your loaded printed circuit boards

- Circular blade for pre-scored panels, saws for all panels
- Punch and router for tab routed PCB's / nibblers
- Unmatched tooling and support for depaneling process

www.fknsystek.com

Components Supply Platform (A one stop solutions shop)

- More than 3,500 components supply partners
- The leading multi-channel and excellent service distributor
- Over 8 Million types of electronic components, with small quantity purchasing available.

www.ameya360.com

The global leader in solder joint encapsulants, underfills, nanofilms and die attach adhesives

- Conformal coating (rigid and flexible)
- Optoelectronic materials, Wafer level materials

www.yincae.com
