MYCRONIC

The industry's fastest **AOI programming is here**

Book your Gen I™ demo today
Inline 3D metrology inspection just got more profitable for high-mix production. With Gen I™ Generative AOI Programming, you can create production-ready 3D inspection programs in minutes – directly from pick-and-place and scan data. No model creation. No library management. No delays.

With Gen I™, your team gains:

- **The industry's fastest programming** — eliminate specialized AOI programming for every new product
- **Faster NPIs** — accelerate introductions with rapid, automated inspection model generation
- **Plug-and-play metrology** — achieve full inspection coverage and traceability with true 3D metrology

The result: over 300 hours saved in AOI programming annually and €80,000+ in improved line utilization.*

Discover how generative inspection is redefining electronics production.
Contact your Mycronic representative for your personal Gen I™demo.

MYPro I50Xz, MYPro I51z, MYPro I91z
Towards zero programming, zero escapes and no false calls

- Zero programming
- Full test coverage
- De-skilled inspection
- Inline AOI
- High first pass yield
- Measurement data

*Based on 100 NPIs per year.
