

What is that?!

What is it doing?!

Thanks for taking an interest in the latest endeavor in Gulfport, Florida !

To help improve the conditions of our sidewalks, we are partnering with **StreetScan**, a Massachusetts-based company that has assessed over 200 communities in North America.

StreetScan employs scooter-mounted sensing technologies to assess the sidewalk conditions. The systems determine the health of each sidewalk and identify defects including tripping hazards and cracking. This data helps the municipality to identify and prioritize repair needs.
