Water Data.....7

Wastewater Data12

TRC has provided water and wastewater rate analysis to local government clients across Virginia for several decades. For questions about this report or rate consultation services, please contact water@TRCcompanies.com.

About Our Survey

For 35 years, TRC has provided the Annual Virginia Water and Wastewater Rate Report as a service to our clients and to water and sewer providers across the Commonwealth. The information summarized herein includes:

- approximate number of residential and non-residential connections
- billing frequency (monthly, bi-monthly, or quarterly)
- the charge for residential customers using 3,000, 4,000, and 5,000 gallons of water per month
- the charge for non-residential customers using 1,000,000 gallons per month
- the current residential connection fee and capital recovery charge
- the year that rates and fees were last changed.

We are pleased to share these results and express our gratitude to all who participated in this effort.

Control Group Data

For over 20 years, TRC's survey has tracked a select group comprised of 20 water and wastewater providers who represent a cross section of utilities across the Commonwealth. We have consistently tracked the monthly residential charges of these 20 utilities to provide an indication of trends in water and wastewater rates in Virginia – and to provide an indication of average increases over time.

The average water rate increased by 5.4% in 2024 and the average sewer rate increased by 0.5%. Since 2014, water rates have increased by approximately 3.3% per year and wastewater rates have increased by approximately 3.0% per year.

AVERAGE WATER AND SEWER BILLS (BASED ON 5,000 GALLONS OF USAGE)

Water And Wastewater Rates

Utilities were asked to calculate the charges for residential customers using 3,000, 4,000 and 5,000 gallons of water per month. Utilities that bill on a bi-monthly or quarterly basis provided rates based on equivalent usage and the rates were normalized to monthly rates. Respondents were asked to use the rates in effect on July 1, 2024.

Residential Connections	# of Replies	Smallest System # of Connections	Largest System # of Connections	Average # of Connections	Median # of Connections
Water	50	61	379,037	19,019	3,236
Wastewater	48	43	128,362	10,938	3,080

Monthly Residential Rates

Utilities were also asked to provide the rate for a non-residential customer that uses 1,000,000 gallons per month. If the size of the meter influences the charges, the utility was to assume a 4-inch meter.

Non-residential Connections	# of Replies	Smallest System # of Connections	Largest System # of Connections	Average # of Connections	Median # of Connections
Water	49	1	12,902	1,054	297
Wastewater	46	4	5,071	765	293

Monthly Non-Residential Rates (Per 1 Million Gallons)

AVERAGE RESIDENTIAL WATER RATES BY SYSTEM SIZE (MONTHLY)

Wastewater Rate Summary By System Size

AVERAGE RESIDENTIAL WASTEWATER RATES BY SYSTEM SIZE (MONTHLY)

Connection Fees And Capital Recovery Charges

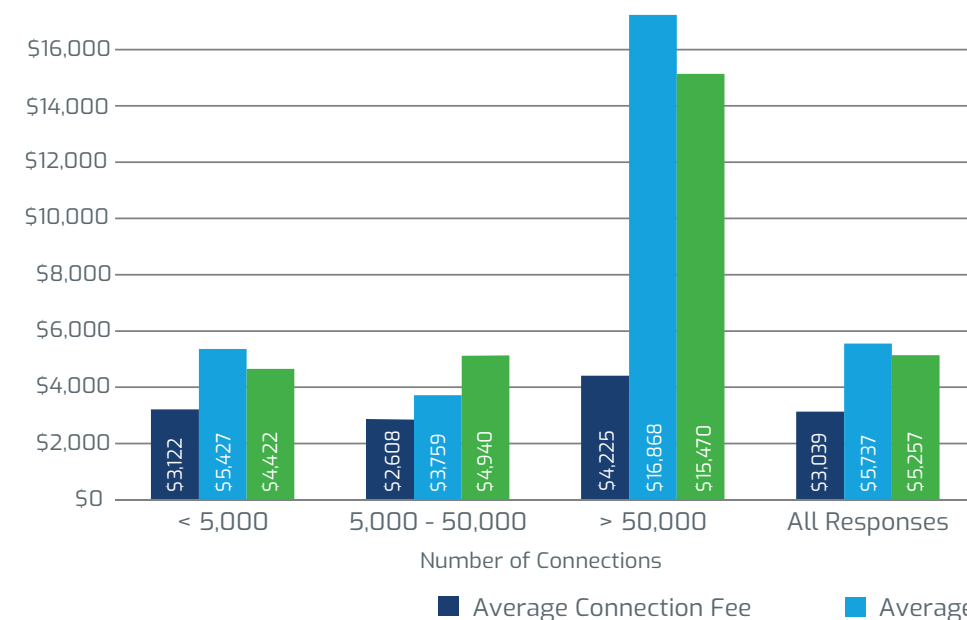

Residential connection fees and capital recovery charges are shown below. Connection fees are charges for tapping into the water main and running a line to the water meter or for tapping into the sewer line and running a lateral to the property line. Capital recovery charges are capital charges for buying into the existing system or charges that recognize the Cost of adding capacity to the system. Providers were asked to furnish the charges for a residential connection using a 5/8- or 3/4-inch meter.

	Connection Fees		Capital Recovery Charges		Combined Charges	
	Water	Wastewater	Water	Wastewater	Water	Wastewater
Average	\$3,039	\$4,109	\$5,737	\$5,022	\$5,257	\$5,896
Median	\$2,030	\$2,675	\$4,842	\$4,760	\$4,578	\$5,401
High	\$21,500	\$17,400	\$27,710	\$17,944	\$18,444	\$18,769
Low	\$80	\$0	\$400	\$155	\$250	\$155

*Fees and charges in this table are for residential connections using a 5/8- or 3/4-inch meter

¹"**Inside**" refers to inside of municipal boundary. "**Outside**" rates are listed where the utility has implemented higher rates to users outside of the municipal boundary.

²**Water Source:** **S** = surface water, **G** = groundwater, and **C** = combination.

³**Connection and Capital Recovery Charge (CRC) Fees:** "**Cost**" = customer pays the Cost of making the connection; "**Cost +**" = the customer pays the Cost to make the connection, plus additional charges, "**Fixture**" or **DFU** means the customer is charged that fee per the number of drainage fixture units in the structure. **Min** = Minimum charge is dollar amount cited.
