

## Workforce Management Made Easy

Introducing the updated **My Employer on the GO** mobile app! This app empowers your employees to stay engaged with you, the employer while providing the employee access to payroll, Human Resource, Benefits, and Time & Attendance information. Now, employees can access their information, from their device, when its convenient for them.

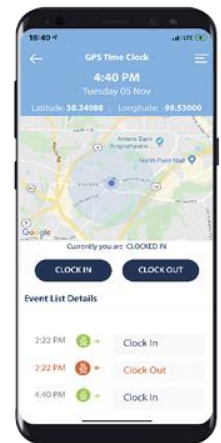

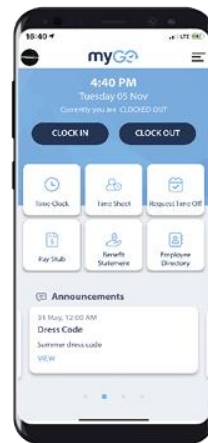

GPS Timekeeping provides additional capabilities for employers to log simple geo-location points for employee time punches, and the advanced feature of creating a "geo-fence" where an employee's punch will capture the GPS coordinates to confirm/deny that the employee is within the geo-fence.

## WORKFORCE MANAGEMENT MADE EASY
