Medical Evidence Discovery and Dissemination (MEDD) Course Research Mentor

Who: Faculty active in research or scholarship (e.g., clinical, basic science, community engaged, medical education, translational, etc.)

What:

- Lead a small group of CITI-trained first-year medical students in a structured curriculum on development of a research question, study design, protocol development, and other guided exercises
- Meet monthly to answer questions, discuss progress, and provide feedback
- Provide guidance on the ethical conduct of research
- Prepare students to present research ideas and findings

Time Expectations:

- Faculty Development: 1.5 hours
- Small Group Facilitation including narrative feedback, admin: 14 hours (~1.5 hours/month for 9 months)

Why: Opportunities to mentor students in critical thinking skills, study design, and the potential for continued engagement in research projects and publications.
