

ENTER TO WIN A \$2,500 PRIZE

 **ALYSE GRAY PARKER
MEMORIAL STUDENT VIDEO
CHALLENGE**

The Alyse Gray Parker Memorial Student Video Challenge is an annual competition hosted by The Science Coalition (TSC) — a nonprofit, nonpartisan organization that makes the case for sustained federal investments in basic scientific research.

Undergraduate and graduate students at TSC member institutions are invited to create and submit videos explaining why science matters to them and to the nation's future. Up to three winners will receive a cash prize!

THE CHALLENGE

Create a **60–90 second** video explaining:

1. Who you are and the university where you study.
2. An example of interesting scientific research that benefits the country. The example can be from your own research or that of others.
3. Why continued federal support for basic scientific research is critical to our nation's future.

Participants will be evaluated based on their messaging and communication, creativity, and video and editing quality.

ELIGIBILITY

Only students enrolled at or affiliated with TSC member institutions can apply. See the full list of current TSC member institutions:
sciencecoalition.org/about-the-coalition/#our-members.

Students from all majors and disciplines are encouraged to enter.

KEY DATES

The 2026 Student Video Challenge will open on **August 3 at 9 a.m. ET** and close on **October 30 at 11:59 p.m. ET**.

Winners will be announced publicly in **November**.

For more information and to submit your video, visit The Science Coalition's website:
sciencecoalition.org/SVC.
