

OCD Endpoint and Schema Documentation Changes 01/12/2026

All OCD Endpoint Changes

1. Formatting has been updated to reflect to RESTful API best practices:
 - a. Changed from Pascal Case (PascalCase) to Kebab Case (kebab-case)
 - b. Sections have been pluralized (Administrative Order → Administrative Orders)
 - c. Some sections have had their names updated (Case → Case Files)
 - d. Property Names changed from Pascal Case (PascalCase) to Camel Case (camelCase)
2. Schema Documentation has been updated to include endpoints, parameters, and response schemas in one location for better readability.
3. Page Size was standardized to a range of 1 – 500, with a default of 250.
4. **All OCD API Definitions** have been renamed to clarify between **v1.0** and **v2.0** APIs.

Original API Definition Name	New API Definition Name
OCD	OCD v1.0
OCD Imaging	OCD Imaging v1.0
OCD Permitting	OCD Permitting v1.0

5. All **v1.0** APIs are deprecated and should be transitioned to version 2. See the **v2.0** API Endpoints.
6. New Filters:
 - ExcludeWellsWithoutCompletions
 - ExcludePluggedWells
 - ExcludeWCancelledAPDs

Their default value is False. If you receive unexpected search results, the missing results may be part of the Wells without completions, plugged wells, or have cancelled APDs.

These filters are located on the following APIs:

- /v2/ocd/imaging/well-files
- /v2/ocd/imaging/well-logs
- /v2/ocd/permitting/wells
- /v2/ocd/permitting/wells/linq
