WHAT'S COOL ABOUT MANUFACTURING

If you're a high school junior or senior, it's time to think about career plans after graduation. Are you considering manufacturing?

- *More than 2 million manufacturing jobs will be available between now and 2030 for candidates with the right skills.*
- *With training and experience, you could earn $60,000-$80,000 in a few years as a quality inspector, CNC machinist, production foreman, technician, assembler, and many other similar options.*

HOW CAN YOU TRAIN FOR A CAREER IN MANUFACTURING?

Consider applying to the Pennsylvania College of Technology's Manufacturing Pre-Apprenticeship Program

- This mostly online program runs from January - May 2027
- Earn up to $500 for completing the program and passing a certification exam.
- By completing this program, you will fulfill one of the state of Pennsylvania's pathways to graduation.

What types of training will I get?

- *You'll learn about measurement, safety, blueprint reading, assembly, robotics, and quality - plus a lot more. You'll go on 2 field trips to leading Lawrence County companies to see manufacturing up close, and hear from manufacturers about job opportunities.*

How do I learn more?

- *Speak with your teachers and guidance counselors who can explain this opportunity in more detail.*
- *Complete the application and return it to your teacher or guidance counselor before December 4th, 2026.*
