

New Key Programming Software Mazda 2020 ADS2322

February 2021

Advanced Diagnostics is pleased to announce the release of the ADS2322 key programming software for specific Mazda models from 2019 onward worldwide.

What does the software do?

The ADS2322 software programs proximity keys with push button start for select Mazda models. This software allows keys to be added or programmed from a lost key situation. The software has been designed to bypass the PIN code automatically in the background, making it a seamless process when programming keys. This software does require a WiFi connection to complete the programming procedure. No NASTF required. The proximity key and the remote functions are programmed simultaneously when using ADS2322.

What else will I need?

*AD cannot/does not guarantee access to the incodes needed to use this software or to how these codes are used, displayed or processed by the OEM

* Based on active testing in the field, some variation may occur, we cannot guarantee bypass success on ALL listed vehicles. 2020 models may still be in production by the OEM and it's always possible they update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
