THE IMPORTANCE OF INDIGENOUS-LED HEALTH INITIATIVES

Looking beyond deficit-based Indigenous health narratives, we will explore the role of Indigenous cultural strengths in advancing health, the importance of Indigenous-led and community-driven initiatives, and the value of Indigenous epistemologies for the field of public health. We will talk through how Western and Indigenous knowledges can help combat public health issues.

Amy Stiffarm, PhD, MPH
(Aaniiih, Chippewa Cree, Blackfeet)
