The Role of Public Health in Addressing Climate Change

This training will explore the latest scientific evidence of how climate change is impacting Montana, as well as explore the role that public health can play in addressing climate change at the community level.

At the end of the presentation, attendees should be able to:

- Have a better understanding of the science related to climate change.
- Have a better understanding of the impacts of climate change in Montana.
- Understand how public health can play a role in addressing the future impacts of climate change.

- **Date/Time:**

5/29/25

9:00 am - 10:30 am

- **Cost:** No Cost

- **Location:** Zoom

Tony Ward, PhD.

Tony Ward is a Professor in the School of Public and Community Health Sciences at the University of Montana. In addition to teaching environmental/public health classes, his research involves working with schools and rural communities on air pollution (forest fires and woodstoves) and respiratory/cardiovascular health issues. He is also the Director of the Montana Public Health Training Center and the Montana Clinical and Translational Research Center.

This learning opportunity is funded
