

# Introduction to Model-Netics

## What does your Management Development look like?

- Are your managers fully immersed in the use of best practices?
- Does your management training offer an enculturation process that reflects your organizational philosophy?
- Do your managers use a common management language?

**Model-Netics** is a management training and development program. Model-Netics is composed of 151 management models that function as guides to thought and action. The models represent key management concepts and translate these concepts into practical, operational tools that have wide application to both organizations and individuals.

The Model-Netics is comprehensive in scope. The course is organized to offer management best practices in the following areas:

- Change
- Selection
- Evaluation
- Compensation
- Delegation
- Motivation
- Planning
- Management Process
- Communication
- Learning & Training
- Control
- Problem Solving
- Decision Making
- Leadership

## Benefits

With Model-Netics, organizations get a highly leveraged, multi-purpose tool that increases organizational effectiveness and efficiency. Increasing the number of individuals in an organization who learn the models helps to build synergies in the following areas:

- **Manager Development**  
Establishment of management best practices
- **Organization Development**  
Common playbook of management guides
- **Communication**  
Common organization-wide language
- **Promote Culture and Team Building**  
Development of the organizational mission and values
