

LOW-LIGHT CQD

5 HOURS

PRICE

\$225

This 5-hour course is designed to introduce individuals to the basic tactics, techniques, and procedures while using a pistol mounted light or hand help light. Students will learn how to safely and effectively enter/defend a structure and move through a building during hours of LOW LIGHT or NO LIGHT. Some of the topics covered will be planning, structure and room layout, entry techniques, areas of responsibility, angles, and danger areas.

LE Members & Teams are encouraged to participate.

Part-One will focus on team entry techniques. We will begin in the classroom where we will cover planning, approach to structure, entry points, room layouts, and the best way to approach an entry for effective movement into that room or structure. Once in the shoot house, students will begin with dry run entries to ensure everyone understands the basic entry and movement principles.

Part-Two will then focus on single-man entry techniques and principles while still focusing on the proper techniques for use of cover, movement, angles, and danger areas.

Most of the course will be held using SIMS, which will be supplied to each student by the instructor. After the initial classroom portion of the course, students are issued a SIMMUNITION Glock pistol,

Simmunition Rounds, and protective equipment. Towards the end of the training day, students will go up against live role players raising realism to a new level.

*This is **NOT** a beginner course. Students should have a clear understanding of safe gun handling.*

Materials Required to Participate:

- Mag Pouches
- Eye Protection

Recommended Items:

- BDU Style Blouse
- Water/Electrolytes
- Insect Repellent
