

SAFETY DOESN'T END AT WORK

 Powered by Systems 24-7

Each year, the number of workers killed in **off-job incidents** exceed the number killed at work by a multiple **more than 10**.

This means that you are at a **greater risk** of being injured or killed at home or during leisure activities than while at work.

Do you find your attention to detail regarding hazards drops when you are at home?

How many times have you seen a neighbour **overstretching on a ladder** or **unjamming an electric lawnmower** that is still plugged in?

Probably more times than you can count.

STAY SAFE EVEN WHEN OFF THE JOB
