

The first phase of public engagement for the **2035 Wake Bus Plan** is underway, and we need your feedback to ensure that the transit needs for our community are being heard. The Wake Bus Plan is an investment strategy. The service and infrastructure projects selected to be funded will help improve and expand Wake County's bus network. With over $1 billion available to spend between 2028 and 2035, we need to understand the priorities of the community. Your input in the plan can result in improved mobility for the community. For example, the recent improvements to the GoTriangle ZWX route were recommended in the previous Bus Plan which was adopted in August of 2023. The engagement website and the online survey are live now. Whether you ride the bus every day, occasionally, or not at all, we want to hear from you. Your perspective and ideas are important. Take the survey at: https://publicinput.com/n62734.
