Wendell Falls

Date: September 21st-October 23rd (weather permitting)

CTI Property Services, in coordination with your HOA and Property Management company, will be performing pressure washing cleaning in your community **Monday, September 21st through Friday, October 23rd** weather permitting.

This service is being performed to maintain the overall appearance and functionality of the community. As part of the community maintenance program, the HOA will be covering the cost of pressure washing the exterior siding of your home, driveways, and front entry patios and walkways. CTI provides a live, updated map (click [here](#)) that shows the status of each building, and we will leave a door tag the day before your service date so you can relocate items.

To ensure a smooth process, we kindly ask that you:

- Relocate vehicles from driveways, and adjacent parking spots during your service window.
- Clear front patios, decks, and areas surrounding your home of any furniture, décor, or valuable items.
- Take proper precautions to protect any electronic devices such as doorbells, locks or cameras.
- Ensure any rear gates are unlocked to allow access.
- Keep windows and doors closed during service.
- Please keep pets secured indoors while work is being performed.
