LANDSCAPE BUZZ

A BI-MONTHLY UPDATE FROM MYATT LANDSCAPING & CONSTRUCTION

MAY/JUNE 2026

Wendell Falls EDITION

Native of the Month: Amsonia hubrichtii

Amsonia is one of our favorite early blooming perennials. Native to Oklahoma and Arkansas, it thrives in full sun and tolerates poor soils well. Its delicate blue flowers and fine, feathery texture bring a soft contrast to the garden. If left in place through fall, it rewards you with a stunning golden display. When adding amsonia to your garden, be sure to give it plenty of space. it may start small, but over 2–3 years it will mature to about 2–3 feet tall and wide.

COMPLETED TASKS

- Ornamental grass cut backs
- Spot spraying weeds
