

WHETHER IT'S AN EMERGENCY OR A PLANNED EVENT,  
HRS IS YOUR **ONE SOURCE**:

Whether it's extra cooling needed during extreme weather conditions or a short-term replacement following an emergency, businesses sometimes require equipment to cool, heat, or power an indoor environment on a temporary basis.

HRS can do just that and more, delivering fast, reliable, and cost-effective solutions when you need them.

A temporary system can keep your business operational while you repair, replace, or upgrade your existing system.

HRS provides scalable cooling, heating, power, and compressed air for unique applications, emergency situations, and special events. Call us, and in no time at all, we can set up, install, and operate equipment for your requirements—indoor or outdoor, short or long-term, large project or small.

Our experienced team of account managers, engineers, service technicians, and logistics professionals can rapidly transform the equipment you need into a smoothly functioning system that will exceed your expectations.

WE'RE HERE WHEN YOU NEED US.

SHORT ON TIME:

A temporary system allows you to continue your business operations while you take the time to find the best permanent solution.

SHORT ON FUNDS:

Capital improvement budgets continue to shrink. A rental from HRS allows you to use funds from your operating budget to accomplish the same objective.

PLANNING AHEAD:

Knowing when and where temporary solutions are available can speed time of deployment in an emergency and limit associated financial losses.

AT PEAK CAPACITY:

A rental is a cost-effective solution for a short-term situation, such as a spike in production that lasts two months or less.

FULL SERVICE SOLUTIONS:

Choose from our wide scope of specialized capabilities when they're needed. Contact us for more information.

ENGINEERED PRODUCTS

Not only are we an OEM of Trane products and backed by years of factory expertise, we have our own in-house custom fabrication and modification division ready to manufacture a solution to suit your individual needs. We have an experienced fleet of trained technicians ready to install and service your equipment, as well as a team of engineers who can assist you in optimizing your processes. No matter the industry or size of the job, our Engineered Products division has the resources to complete major, turnkey design projects around the globe.

LEASE-TO-OWN RENTAL OPTIONS

We are here when you need us, and our lease-to-own options let you focus on the solution, not the expense.

INDUSTRIAL SERVICES

Our Industrial Services team is comprised of qualified technicians to service, troubleshoot, and repair your process equipment. We provide temporary solutions to meet the high demand of your production needs, so you don't have to worry about costly downtime. HRS works hand-in-hand with our Industrial Services team to minimize downtime and mitigate any unforeseen risks.

- Unitary HVAC Comfort Cooling
- Process Absorption Chillers
- Process Ammonia Chillers
- Process Centrifugal, Scroll, and Screw Chillers
- Compound and Cascade Systems
- Multi-Stage Centrifugal Systems (Nominal and Low Temperature)
- Multi-Stage Gas Compression
- Cooling Towers
- OEM Trane, or Any Other Brand of Equipment

COMMON RENTAL APPLICATIONS

EMERGENCY

When the unexpected happens, our extensive network of rental depots and service centers enable us to quickly provide generators and HVAC equipment on site to help you recover as soon as possible. Take advantage of the contingency planning services at your local office to be ready for anything.

PLANNED SHUTDOWN

A shutdown of HVAC, power and/or compressed air equipment in order to conduct planned maintenance or make major improvements or renovations. Temporary equipment can help you maintain normal operations during this period.

SEASONAL

Special circumstances may demand power, heating/cooling, or compressed air beyond the capacity of a facility's existing equipment. Temporary supplemental equipment can fulfill these requirements in a cost-effective manner.

SPECIAL EVENTS

Specialized situations and environments call for specialized equipment. We have the temporary cooling, power and compressed air systems you need to support your golf tournament, harvesting, ice rink, festival, concert or other special event.

POWER • HVAC • AIR

INDUSTRIAL • HEALTHCARE • COMMERCIAL • EDUCATION • HOSPITALITY • ENTERTAINMENT

## AIR-COOLED CHILLERS

**Air-cooled chillers are ideal when speed, ease of installation, and reliability are all priorities.**

- Equipped to provide quick restoration of cooling in emergencies or planned situations
- Great for all markets to provide cooling for both process and comfort applications

**AVAILABLE PRODUCTS:**

- 25–500 ton / 480V
- Integrated pumps on most models
- Leaving water temperature range of 0–65° F

## WATER-COOLED CHILLERS

**Modified for easy installation to provide fast, temporary backup or added capacity in an energy efficient manner.**

- Ideal for large process and comfort cooling applications that require higher efficiency equipment
- Weatherized for outdoor use
- Larger tonnage in a smaller footprint

**AVAILABLE PRODUCTS:**

- 225–1,000 ton / 480V & 4,160V models available
- Units are weatherized for outdoor use
- Starters are unit mounted

## VERTICAL UNITS

**Designed to meet the specific needs associated with heating and cooling for outdoor and special events.**

- Designed for integrated cooling and heating
- Optimized for minimal noise output and footprint
- Modified for rental with cam lock connections and four-way forklift skid
- Simplified controls for ease of operation
- Capable of producing heated or chilled air

**AVAILABLE PRODUCTS:**

- 10–30 ton

## PORTABLE A/C

**Portable A/C units can do more than just cool– they can also dry wet areas and protect equipment from water and humidity.**

- Maintenance-free operation
- Totally self contained
- No costly installation necessary
- Ideal for server rooms, laboratories, and other small to medium sized spaces

**AVAILABLE PRODUCTS:**

- 1–5 ton

## ANCILLARY

**In addition to a wide selection of rental solutions, we also have all the accessories needed to get your equipment up and running quickly.**

- Provide complete temporary solutions
- Help us tailor solutions to your specific needs
- Switchable between natural gas and propane

**AVAILABLE PRODUCTS:**

- Pumps, transformers, power distribution, flex hose, electrical cables, flex ducts, trailers, and MORE

## COOLING TOWERS

**Our line of cooling towers can be rented as standalone units or paired when water applications are needed.**

- Provide the cooling for water-cooled chillers and can be used directly in process and manufacturing cooling applications
- Temporarily replace a tower that has gone down

**AVAILABLE PRODUCTS:**

- 250, 270, 500, and 750 ton units

## HEAT EXCHANGERS

**Our heat exchangers are plate-and-frame type and provide fluid-to-fluid heat exchange in chilled/hot water applications.**

- Provide the cooling for water-cooled chillers and can be used directly in some process cooling and manufacturing applications
- Allow transfer from one cooling method to another

**AVAILABLE PRODUCTS:**

- 100–500 tons
- Modified for indoor or outdoor use

## GENERATORS

**Whether you need to power one of our temporary cooling solutions or just need additional power, we have options ranging from 36 kW to 1.5 MW.**

- Cam-type electrical connections
- Forklift compatible
- Larger units can be set up in parallel to provide addition power solutions

**AVAILABLE PRODUCTS:**

- 36 kW – 1.5 MW

## POWER

**Weatherized for outdoor use, a wide variety of power distribution equipment is available to support all units in most situations.**

- From cables to distribution boxes, we can provide a solution to your power distribution needs.

**AVAILABLE PRODUCTS:**

- Quad string cables
- 20A & 50A extensions
- Spider boxes
- Transformers

## ELECTRIC HEATERS

**Electric heaters provide clean, electric heat that is free from the moisture and fumes associated with other types of heating.**

- Cam-type electrical connections
- Forklift compatible
- Flex duct connections

**AVAILABLE PRODUCTS:**

- 50 kW & 150 kW electric heater
- Capable of 170,000 to 512,000 Btu/h

## AIR HANDLERS

**Custom engineered air handlers are the perfect solution for larger jobs and are outdoor rated and sized for 100% outside air.**

- Turn cold water into cold air
- Ideal for providing air conditioning to very large warehouses, tents, or other facilities
- Low temperature 30-ton Krack units also available

**AVAILABLE PRODUCTS:**

- 5,000cfm, 10,000cfm, 20,000cfm, and 25,000cfm

## AIR CONDITIONERS

**These state-of-the-art packaged rooftop air conditioning units provide quiet and efficient temperature control and are modified to be lifted by crane or forklift.**

- Quickest and easiest source of temporary cold air
- Restore cooling in an emergency or cool a previously unconditioned space
- Convenient for special venues & outdoor sporting events
- High-static 35 and 50-ton units available

**AVAILABLE PRODUCTS:**

- 25 – 50 ton

## COMPRESSED AIR

**We offer ISO Class 0 Certified rotary screw oil-free air compressors to supply pure air for critical environments.**

- Available for planned or emergency shutdowns
- Easy installation
- Professionally maintained for optimum performance
- Various pressures available (65 – 140 psig)
- Components available to dry & filter compressed air

**AVAILABLE PRODUCTS:**

- 200–400 hp oil-free rotary screw air compressors

## DRYERS

**Compressed air dryers help protect compressed air users from water impurities, while improving productivity and system efficiency.**

- Available for planned or emergency shutdowns
- Easy installation
- Professionally maintained for optimum performance

**AVAILABLE PRODUCTS:**

- 800 & 1500 cfm air dryers

## DEHUMIDIFICATION

**Dehumidification Units (DHU) are highly efficient at providing clean, dehumidified air with minimal electrical power required.**

- Duct collars on the supply and return enable quick-tie-in to the building system
- Post cooling coil allows you to control the returning air temperature into the space

**AVAILABLE PRODUCTS:**

- 5,000 cfm desiccant dehumidifiers

## INDUSTRIAL SERVICES

We help our chemical customers reduce plant downtime and increase profitability by utilizing our fleet of critical utility solutions.

- Emergency response for unplanned equipment or system failure
- Additional capacity due to seasonal limitations
- Planned outages
- Production area dehumidification and cooling
- Dense air intake cooling
- De-bottlenecking critical path process
- Augmenting existing equipment
- Mechanical repairs and rebuilds - OEM (Trane), York, FES, Frick, Carrier, Vilters, and Absorbers
- Service and service agreements
- Upgrades and retrofits
- Lease-to-own of new equipment

## SUPERIOR SUPPORT

- Fully insured and licensed: TACLA009290C, MPL 38267
- \$10 Million bonding capacity
- Multiple financing sources
- 120+ service technicians
- Dedicated HSE (Safety) team

## MODIFIED FOR EVERY APPLICATION

Our equipment is modified for easy installation and operation.

- Integrated lifting frame for overhead crane or forklift
- Altered for quick connects
- Shore power

## ADVANCED TECHNOLOGY

We provide the same advanced equipment that has made Trane the leader in HVAC applications.

- Latest models with annual fleet updates
- Compatibility with building control systems
- Remote monitoring capabilities
- Equipment undergoes regular run testing and full maintenance options help prevent downtime
