HUNTON HIGHLIGHTS & EVENTS

Cool Rides & Hot Rods: First Annual HVAC Industry Car Show

On Saturday, October 26th, 2019, Hunton teamed up with HPD Clear Lake to bring Houston its first HVAC industry car show. All of the proceeds from this event went to HPD Clear Lake's Backpacks for Kids- an organization that makes it possible for thousands of children in need to receive backpacks and school supplies every year.

The event was open to the public and free to attend. The morning kicked off with our executive team leading a police escorted VIP cruise through Houston. Eventually, everyone lined up their vehicles in the Hunton Distribution parking lot for viewing. Our Hunton volunteers cooked and served up tacos and gave out door prizes while everyone strolled around checking out all the vehicles. We had a distinguished panel of judges that voted on the winners and attendees participated in voting for the People's Choice Award.

The event ended up being a huge success for a wonderful cause. We hope to see you and your family at the next **Cool Rides & Hot Rods** HVAC industry car show in 2020!

HUNTON SMART CENTER

The Value of Connectivity

At Hunton Services, we understand that buildings are composed of complex structures, technologies, and systems. As these systems have evolved and improved, there are more options than ever to operate efficiently and effectively. You can now connect your building's performance to the mission of your business with Hunton SMART Services.

With the addition of Hunton SMART Services to your building automation system, we will utilize analytic technology to perform perpetual commissioning on your building. At our Hunton SMART Center, performance on multiple systems throughout your building are continuously measured to find hidden or unnoticed equipment faults, performance problems, as well as the root cause of those problems.

Whether we're just supervising HVAC systems or a comprehensive building automation system covering your entire building or campus, the experts at Hunton SMART Services can offer you a virtually self-operating smart building so you can focus on your business.

INDUSTRY NEWS FROM TRANE

Approaching Zero Energy

Every building, commercial or residential, has a financial or sustainable goal – or both! Either way – a more flexible, energy agile zero energy building offers a more powerful way to decarbonize and reduce energy spend, providing lower costs at higher value. As more renewable energy is added to the grid and to buildings, load flexibility offers a powerful way to decarbonize, manage energy loads and reduce energy spend.

BEFORE

PROJECT SPOTLIGHT

Brazosport College

Our Special Projects team was tasked with replacing 30+ year old chill water and hot water piping at Brazosport College. It was a labor intensive job with many moving parts. With just a two-week time frame, our team installed the proper flooring and wall protection before the project even commenced. In the end, we demoed almost a mile of piping on this project. New isolation valves were installed and all the new piping was re-insulated. The last phase of the project entails the installation of 2x2' lay-in grid ceilings, installation of new LED lighting in the hallways, and updating the pipe drawings and specifications for the college to show the correct pipe sizes, connection points, and newly installed valves.

For more information on what our Special Projects team can do for you, [visit our webpage](#) or call us at 713-643-8336.

AFTER

HUNTON VIDEOS

In 2019, we began an initiative to bring you a more accessible way to explore our capabilities here at Hunton Services. So far, Hunton Rental Solutions and our Industrial Services team have created for you a quick and easy way to learn about some of our many capabilities. Check them out below and stay tuned for more videos to come!
