

# Responsive Classroom

## Social-Emotional Learning Techniques

### Parents Can Use At Home

Medway elementary schools recently adopted *Responsive Classroom* as their core social-emotional learning program. *Responsive Classroom* is an evidence-based approach to teaching that focuses on engaging academics, positive community, effective management, and developmental awareness.

Through the use of *Responsive Classroom* techniques students will develop social-emotional learning skills related to self-management, self-awareness, social awareness, relationship skills and responsible decision making.

- ★ Social-emotional learning techniques are most effective for children when they are used at school, at home and throughout the community.
- ★ This evening of active learning will provide parents with insight to how their children are being taught social-emotional learning skills and will provide them with techniques that they can use at home with their children.
- ★ Activity-based childcare will be graciously provided by Medway High School students for the duration of the program.

**October 24, 2018**  
**6:30-7:30 p.m.**
