

MCGOVERN PROGRAMS

MG10. SNAP CIRCUIT WORKSHOP – Grades K & 1

The super-cool Snap Circuit System is designed for young scientists as they investigate electricity, current, resistance, energy storage and conductivity. Students work at building electronic projects that fly, buzz, light-up and interact with the environment all while having a wicked cool time with friends. Please send a lunch and drink with your child.

Wicked Cool For Kids Staff – Cafeteria

MG11. SNOW MUCH FUN! – Grades K & 1

If you love to laugh, play, jump, sing, craft and act, join Miss Elaine for an afternoon of fun! Friends will play parachute games, sing silly songs, create a winter craft and act out a winter story. We will also turn the cafeteria into a “winter wonderland” as we ice skate, throw snowballs and go sledding. Please send a lunch and drink with your child.

MM26. SPORTS MANIA – Grades K-4

Are you looking for an exciting activity on the two early release conference days? If your child loves to play fun games and sports, this is the program for them! Let us help keep your child happy and active with two stimulating afternoons of soccer, flag football, kickball, dodge ball, and wiffle ball. Each sport will be played with a variety of instructional and entertaining games and scrimmages. Students are dismissed at 12:00pm; there is no transportation provided from McGovern School to Memorial School. *Students must be escorted by parent/guardian to the Memorial School Gym at 1:00pm.*

MM24. MAKE A CIRCUIT WORKSHOP – Grades 2-4

Spark your interest in electronics with this workshop from Circuit Lab! Participants will discover basic circuitry and programming concepts and apply them to creative, expandable projects. Each participant will create a custom light-up circuit game from individual components, and, working in pairs, use Arduino microcontrollers to design programmable light circuits. At the end of the program, the homemade games are yours to keep. Our experienced instructors will help participants create the devices of their dreams. Please send a lunch and drink with your child.

MM25. EXTREME SCIENCE – Grades 2-4

This program is perfect for anyone fascinated with science and enjoys hands-on science experiments! Extreme Science explores the extreme conditions that exist in nature regarding temperature and electricity. Liquid Nitrogen is used in experiments to demonstrate the effects of cold temperatures on many objects. Students learn about expansion, contraction and gas laws then create a cryogenic vacuum. Instantly-made ice cream is also enjoyed by all! Students participate in experiments with simple circuits, static electricity, high voltage electricity, miniature lightning bolt and a plasma lamp. All students wear safety glasses and gloves during all experiments. Please send a lunch and drink with your child.
