

Medication Therapy Management

Do you have Diabetes, Hypertension or High blood pressure?

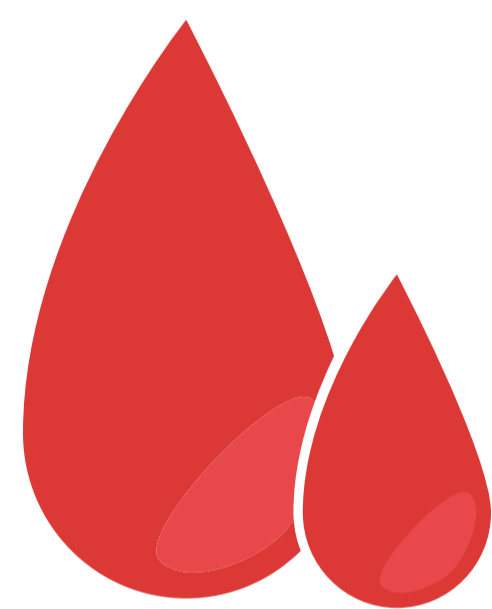

Spend quality time with the pharmacist over the phone to answer questions about your medications and how they impact your health.

Medication Therapy Management, MTM, provides an in-depth one-on-one review of all your medications (prescription, over-the-counter, vitamins and herbals) and evaluate the safety and effectiveness of your medication therapy.

MTM Objectives

Medications
interaction
and side effects

Effect of
medication to
blood sugar, blood
pressure
and cholesterol

Cost-effective
options available

Taking the
medications at
the right time of
day or in the right
order
