Nicholas,

Thank you for sending the OSRP for review and approval. There are still items that must be dealt with for the plan to receive final approval:

1. The Water Resources section must include information on wetlands in the narrative, as well as information on the town's watershed(s). You should check the text here as it looks like whatever it is that you copy and pasted was copied twice.
2. Scenic Resources and Unique Environments – any unusual geologic features in town should be included here.
3. Environmental Challenges – this section must includes subsections on landfills, hazardous waste sites and environmental equity. Environmental equity refers to looking at the distribution of open space and recreation resources in the town and identifying any areas that are lacking in them.
4. Section 5 – in the table that lists town-owned conservation and recreation properties, the current use column must list specific amenities that are available at the site, "conservation" or "recreation" is not sufficient. The condition column must include information such as "excellent", "good", "fair", "poor". The recreation potential column must list specific amenities that may be developed at the site. A type of grant (if any) used to purchase or renovate the property column must be added. The degree of protection column must be filled in completely. Are there any Agricultural Preservation Restrictions in the town?
5. ADA – it doesn't appear that all of the town-owned conservation and recreation properties have facility inventory forms completed for them. Please complete them (they are in the OSRP Workbook Appendix).
6. Maps – The Action Plan map is missing.

Please let me know if you have any questions.

Melissa
