

2021 Summer Arts Catalog

Sacramento Art Organizations' Classes and Camps Summer Offerings

Virtual and In-Person

Parents, Students, Educators and Artists,

Our summer catalog of offerings from our Art Organizations continue to support our goal of student engagement in the arts all year! These offerings are in many of the art forms such as dance, music, creative writing, theater, performance, all which support student development in the arts. This summer, the offerings are virtual and in person. Take time to review the offerings and register your student(s) in an offering that will enhance their summer and continue their engagement in the Arts!

Summer Camp 2021 FAQ

Are there class sessions on the weekend?

We'll meet Monday-Friday, 9:00am-2:00pm for Juniors & Youth; 10:00-3:00pm for Teens. Each session will culminate with a showcase performance on the final Saturdays, where our young performers show off everything they've learned. Due to current health guidelines, *attendance will be limited.*

Is lunch provided?

Each student should BRING A BAG LUNCH. We will eat around noon each day in the courtyard. We will also have a snack break in the morning. An individually packaged snack will be safely provided.

Do we need to audition?

Auditions are not required for the Studio for Young Actors Summer Program. All skill levels welcome. We make an effort to pair students appropriately in regards to age and skill level.

What if I need to cancel? Is class registration non-refundable?

There is a \$25.00 processing fee for all cancellations. There are NO refunds once classes begin.

#1 Morse Code Music (patterns, communication, and history)

In Morse Code Music, Phil shows how language and patterns are used to communicate over long distances. From the covered wagon days of the 1800's, to modern-day messages sent into space, Phil shows how we have digitized our alphabet into a code that we can read, hear, and now play as music! Your students will visit the Voyager spacecraft and experience images and languages on NASA's Golden Record. They will also make a homemade musical instrument and join Phil in playing his Morse Code Mambo song! Before the presentation, please have on hand: a card, and a comb or brush.

#2 Story Reading and Music (comprehension strategies)

In the Story Reading and Music program, Phil features the classic Rudyard Kipling tale about how the elephant got its trunk - complete with drums, interactive questions, and think-aloud games. He also tells sound stories, made up entirely of sound effects. As the students listen to thunderstorms, barking dogs, and race cars, they learn to connect their knowledge of sequence, inference, and prediction, to the sounds in their world. Lastly, Phil shares his favorite reading comprehension games at his website!

#3 Journey through the Mind (mindfulness, brain science, and social/emotional skills)

In Journey through the Mind, Phil begins with an entertaining musical exploration of the brain, focusing on vision, hearing, emotions, memory, and movement. Then he leads the kids through a series of fun activities on imagination, patterns, and memory games. Throughout the program, Phil shows the students his mindfulness breathing exercises for emotional balance, focused listening, and successful learning.

#4 Math and Music (geometric shapes, fractions, and patterns)

At the Math and Music presentation, you'll learn how to play popular hand drum rhythms from West Africa, and how to create your own drum patterns using Phil's on-line drum machine. In addition, you'll hear Phil's five favorite fractions with a musical journey around the globe. Along the way, you'll hear instruments and songs from Indonesia, China, Ghana, Mexico, and the Caribbean. Phil will also show you some of his geometric-shaped instruments, and teach you how to fold those shapes into an origami popper for a music making activity!

#5 Math, Science and Sound (energy, sound waves, measurement and science experiments)

Phil's dynamic presentation on Math, Science and Sound integrates math songs, hands-on experiments, mobile apps, and fun technology tools. He uses a sound cannon to show how mechanical energy moves the air to make sound. He also demonstrates how energy can be converted into multiple forms by transmitting sound over a beam of light using a flashlight and a solar cell. Finally, he shows the students a variety of fun scientific experiments they can do at home with just a smart phone!

#6 Homemade Music (math and measurement)

In Homemade Music, Phil demonstrates all of his wacky homemade instruments, and shows the students how to transform common household items into musical marvels using math and measurement! Phil features straw oboes, sprinkler pipe panflutes, and water bottle xylophones, along with his online follow up activities. Before the presentation, please have on hand: an empty soda can, or an empty water bottle. This will be used to make a homemade shaker to play rhythm games together during the program!
