

"Delivering Peace of Mind"

Press Release

Advanced Security Systems Expands to Lake County, Welcomes High Country Security Customers

Trusted, Local Security—Now With Even More Support and Services

Clearlake Oaks, CA- In a move that combines two of Northern California's most trusted names in security, Advanced Security Systems is proud to announce the opening of its new office in Lake County following a strategic merger with local provider High Country Security.

For over a decade, High Country Security has been a household name in Lake County, known for its reliable service and commitment to the community. Now, with this merger, customers can expect even more—more support, more technology, and more peace of mind—while still enjoying the hometown service they've come to trust. As Advanced Security Systems opens its doors in Lake County, it does so with deep respect for the legacy built by High Country Security and a commitment to carrying that legacy forward with enhanced resources and innovation.

"At its heart, this is a story about growth without compromise," said Chuck Petrusha, President of Advanced Security Systems. "We're expanding our footprint to better serve Lake County, but we're also keeping the things that matter most—local people, local knowledge, and a dedication to exceptional customer care."

Advanced Security Systems, a family-owned company now in its second generation of leadership, has protected homes and businesses across Northern California for over 50 years. Known for innovation and service excellence, the company brings an entire team of licensed technicians, 24/7 support, and award-winning security services to Lake County.

But perhaps the most reassuring part of this transition? The faces behind the phones and the trucks aren't going anywhere.

Craig Rosenquist, the longtime leader of High Country Security, is staying on as part of the new team, along with trusted staff members Julie, Shane, and George. Their continued presence means customers can expect the same responsive service, now with the backing of a larger, highly trained team.

"This isn't just a business decision—it's a relationship decision," said Rosenquist. "I've known the folks at Advanced Security Systems for nearly a decade. I trust them to care for our customers as much as we have. And I'll still be here to make sure that happens."
