## Advanced Security Systems Introduces Mobile EasyCall PERS Devices

Advanced Security Systems, a locally owned and community-focused security provider, is proud to announce the addition of fully mobile EasyCall Personal Emergency Response System (PERS) devices to its life safety solutions.

Personal Emergency Response Systems are wearable devices designed to provide immediate access to help during emergencies, offering peace of mind for individuals and their families. Traditionally used in the home, today's PERS technology has evolved to support active lifestyles by providing protection wherever life takes you.

The EasyCall Mobile PERS device combines nationwide cellular connectivity, GPS location technology, and professional emergency monitoring, allowing users to summon assistance with the push of a button—whether they're at home, shopping, exercising, traveling, or visiting loved ones.

"For more than 55 years, our mission has been to help protect the people, families, and communities we serve," said Chuck Petrusha, CEO and President of Advanced Security Systems. "EasyCall extends that commitment by providing reliable protection not only at home, but wherever life takes our customers."

### EasyCall Mobile PERS Features Include:

- **Mobile Protection** – Works anywhere cellular service is available
- **GPS Location Technology** – Helps responders quickly locate the user during an emergency
- **Two-Way Voice Communication** – Direct connection to trained emergency operators
- **Water-Resistant Design** – Protection in the shower and other wet environments
- **Long Battery Life & Simple Charging** – Designed for reliability and ease of use
- **Caregiver App** – Provides location information, activity tracking, alerts, and wellness insights for family members and caregivers

EasyCall is ideal for seniors, individuals with medical conditions, those recovering from surgery, or anyone who wants added confidence knowing help is always within reach. For family members, it offers reassurance that loved ones can quickly connect with assistance when needed. Unlike other medical alert devices, EasyCall is backed by professional support from Advanced Security Systems, including setup assistance, 24/7 monitoring, and responsive local service.

Advanced Security Systems has helped protect homes, businesses, and communities through innovative security and life-safety solutions since 1971. The addition of EasyCall Mobile PERS further strengthens the company's commitment to protecting people wherever they go.

For more information about EasyCall Mobile PERS devices, contact Advanced Security Systems at (707) 445-9911 or visit [www.GetEasyCall.com](http://www.GetEasyCall.com).
