

Ascension Isn't Just for Humans

Ascension is for everyone and everything living on the planet, this includes animals, trees, in fact all of nature. Animals have souls as do trees. They also have a Higher Self. We are all here to raise our vibrations and ascend with Gaia. Being an animal and nature communicator, I connect with my two cats Mimi and Jazz, as well as my plants. I noticed their energies changing with the Ascension symptoms.

Mimi is a perchat and has been with me in many lives. We were in Egypt when I was a student in one of the Temples. She was my guardian. She is very psychic, intelligent and very protective of me. Some days she was overprotective and aggressive. I just sent an email to Krista and Dan. They released whatever energy she chose to let go. Jazz is an easy going orange cat. He is pure unconditional love. He loves to sleep in one of his many favourite spots. He loves being with Mimi and I and life is beautiful.

A few days ago I noticed sadness in Mimi's eyes. I connected with her Higher Self. As of February 10th 2018 Gaia is now totally in 5D. My life is very busy and Mimi now feels she no longer has a purpose (be my guardian). She wants to go home. In her next life she wants to be a human. Mimi is very curious and always close to me to see what I am doing. Because I was busy we did not spend as much time together. I told her I always want her as my guardian in this life. From now on she will be with me whenever I am working in the house. She is happy now and will stay as long as she can. She is now 14.

I once had a white cat named Smokey. He had long hair and a majestic look. He showed up at our house one day very hungry and sick. Of course we took him in. We took him to the vet for a checkup. The vet said he was about 2 years old and not neutered. We had him neutered and he came home to be with our 2 other cats Sweetheart and Lizzie. Moving forward to age 18. He was in perfect health. He loved going outside. He could jump a 6 foot fence as if he was only a young cat. One day he started to pee on our slippers. He did it 3 times to 3 different persons. We were shocked as he never did anything like that nor the other cats. I called my friend who was an animal communicator. She said he peed on the slippers because he wants to go home and I am not getting the message. He is finished with this life. It's been a happy one but he is ready to go home. I was shocked but I understood and agreed to take him home.

I phoned the vet to make the appointment for the next day. The next morning he asked for the door as usual. He went around the garden smelling the flowers...he was saying goodbye. When it was time to go I said Smokey we have to go. I opened the car door and he went in. My brother drove as I was crying and holding Smokey. He crossed over peacefully.

Over the years I began to communicate with animals and nature. One day I decided to check on Smokey to see where he was. My Guides told me he was reincarnated as a human. He was travelling the world and loving it.
