

MASTERFIT TRIM SYSTEM

MASTERFIT™
— TRIM SYSTEM —

WHY USE THE MASTERFIT TRIM SYSTEM

MasterFit Trim has been designed to make installation easier. When installing replacement windows, hand trimming can take an hour per window. If you're doing a large-scale remodeling project, or an entire home, this can be very costly in terms of time and labor. Not only that, but hand trimming introduces many opportunities for error like uneven edges and inconsistent staining.

SAVES TIME

ProVia's® mortise and tenon corner locking system makes this a quick and easy installation.

To save even more time, when ordering the MasterFit Trim System for a full tear-out replacement, be sure to order it assembled with the jamb extensions attached to the window.

SAVES MONEY

Using MasterFit Trim allows installation without the use of a trim carpenter, therefore saving the homeowner added labor costs.

MasterFit Trim comes with a warranty, ultimately saving the homeowner from repair costs should something happen after the installation.

HOMEOWNER PEACE OF MIND

The factory-finished MasterFit Trim System comes with a 10-year finish warranty.

The entire trim system can be installed with little disruptions in the home since it can be ordered pre-assembled with the jamb extensions already attached to the window.

The mortise and tenon corner locking system ensures the trim will not crack over time, leaving behind a beautifully finished window.

ENSURES THE JOB IS DONE RIGHT

If MasterFit Trim is being installed in an older home, chances are, the interior walls may not be perfectly plumb. The jamb adjustment feature on this trim system allows for up to a 1/4" variation all the way around the window.

While regular casing would leave gaps, the MasterFit Trim System will sit snugly against any wall.

3 OPTIONS TO BEST FIT YOUR PROJECT

HOW MASTERFIT ARRIVES

A

INSTALLED

Jamb extensions are clipped to the window

Casing assembled and packaged separately if it's less than 60". If over 60", casing is knock down.

B

ASSEMBLED / SHIPPED LOOSE

Cut to size and assembled if less than 60". If over 60", all jamb and casing pieces would be knock down.

Jamb extension and casing packaged together but separate from window

C

KNOCK DOWN (KD)

All pieces cut to size and shrinkwrapped together

WHAT TO EXPECT ON THE JOB

A

2-STEP PROCESS

The Quickest Application

- 1 -
Install window with jamb extension attached
- 2 -
Attach casing & secure

B

3-STEP PROCESS

This option is great when windows need to be installed into an opening, and drywall work has not been completed. Trim can be ordered at a later time, separate from windows.

- 1 -
Match corresponding line number with window number
- 2 -
Insert jamb extension & install
- 3 -
Attach casing & secure

C

5-STEP PROCESS

With **No Measuring Or Cutting** Required

This option is also great when drywall work has not been completed and space is limited. Trim can be ordered at a later time, separate from windows.

- 1 -
Match corresponding line number with window number
- 2 -
Assemble jamb extension box
- 3 -
Assemble casing
- 4 -
Insert jamb extension & install
- 5 -
Attach casing & secure
