Public Health

The field of public health is growing, quickly. To study and work in public health is a commitment to better lives every day in every part of the world. Looking at health from the macro or micro level, public health specialists are creating a healthier world now and for future generations.

Careers in public health give practitioners the opportunity to improve the overall health of communities in a field that provides flexibility, innovative thinking and personal satisfaction.

At Stempel College, studying public health is an opportunity to learn from renowned faculty who are on the frontlines of innovative research.

Areas of Concentration:

Biostatistics

Environmental Health Sciences

Epidemiology

Health Policy and Management

Health Promotion and
Disease Prevention

Maternal and Child Health

Online MPH
(generalist concentration)

The Public Health school is ranked among the

Top 50

programs at public universities by
U.S. News and World Report (2020).

BIostatISTICS

Students who choose the MPH with a concentration in biostatistics learn to understand and interpret data driven by research – a skillset that is at the forefront of the public health field.

Biostatistics students at Stempel College have the opportunity to collaborate across public health disciplines to extract and analyze data across the college's areas of research.

ENVIRONMENTAL HEALTH SCIENCES (EHS)

The graduate level Environmental Health Sciences (EHS) programs prepare students for professional roles where they will apply mechanism-based and evidence-based research to help detect, prevent and control adverse influences of the environment on human health.

The EHS department advocates for research-led teaching, so students receive first-hand experience working with an interdisciplinary faculty that includes toxicologists, neuroscientists, cancer scientists, pharmacists, molecular biologists and environmental/water resource scientists.

EPIDEMIOLOGY

Choosing epidemiology positions students to find solutions to serious public health problems like cardiovascular disease and cancer.

Epidemiology students have the opportunity to work alongside researchers who are investigating Latino health, LGBTQ health, health disparities, tobacco control, women's health, and HIV/AIDS.

HEALTH POLICY AND MANAGEMENT (HPM)

Students in Health Policy and Management (HPM) are poised for careers in health care management, health economics and population health management.

The department's faculty and staff inspire students as they engage in research focused on public health policy analysis, health economics, and health systems analysis.

HEALTH PROMOTION AND DISEASE PREVENTION (HPDP)

Health Promotion and Disease Prevention gives students the tools they need to address the behavioral, social and cultural factors related to individual, community, population health and health disparities over the life course.

Students can expect to work on research that includes HIV/AIDS, health disparities, diabetes and obesity interventions, asthma, and community-based participatory research.

ONLINE MPH (GENERALIST CONCENTRATION)

The Master of Public Health is available fully online, with all core and concentration courses taught by the same renowned faculty who provide onsite instruction.

Programs offered:

Biostatistics

MPH in Biostatistics

Environmental Health Sciences

MPH in Brain, Behavior and the Environment

MPH in Environmental Health Sciences

Ph.D. in Public Health with a concentration
in Brain Behavior and the Environment

Ph.D. in Public Health with a concentration
in Environmental Toxicology

Graduate Certificate in Environmental Health

Epidemiology

MPH in Epidemiology

MPH in Infectious Disease

MD / MPH Combined Degree

Ph.D. in Public Health with a concentration
in Epidemiology

Graduate Certificate in Epidemiology

Health Policy and Management (HPM)

MPH in Health Policy and Management

MPH in Health Economics

Master of Public Health (MPH) / Master of
Social Work (MSW)

Ph.D. in Public Health with a concentration
in Health Systems Research

Graduate Certificate in Health Policy

Graduate Certificate in Health Economics

Health Promotion and Disease Prevention

MPH in Health Promotion and Disease Prevention

MPH in Maternal and Child Health

Ph.D. in Public Health with a concentration in Health
Promotion and Disease Prevention

Ph.D. in Public Health with a concentration
in Health Disparities

Graduate Certificate in Health Promotion

Graduate Certificate in Maternal and Child Health

Online MPH

MPH in Public Health with a Generalist Concentration

What our alumni say

"I have been able to apply what I have learned in specific classes to my internship and will hopefully continue to do so in my future job."

**MPH in Health Promotion
and Disease Prevention, '17**

"The epidemiology department has abundant opportunities for students to engage in top tier research. Professors make the extra effort to get students engaged in lectures and have flexible office hours."

**MPH in Epidemiology—
Accelerated Track, '17**

"The combination of in-person and online classes provided the flexibility needed for the program."

**MPH in Environmental
Health Sciences, '18**

"What I liked most about the program was the opportunity to practice what we are learning."

MPH Biostatistics, '18

"What I appreciated about the course was the ability to enter into discussions with professors and peers on what changes need to be made in regards to policy and health care."

**MPH in Health Policy and
Management, '17**
