

Supporting your Child with MAP Testing

CAN

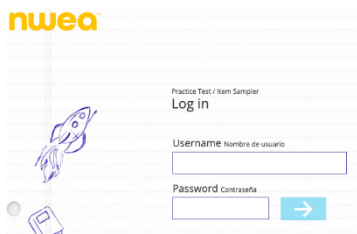

CANNOT

Help them with logging in to the Teams call and to test.mapnwea.org

Type in the Session Name & Password from the teacher here **nwea**

Show them how to select/click **their answer** and the blue button  that takes them to the next question.

Questions are read aloud to all students in K-1 by clicking the  icon in the top left. **Show them how to click that and tell *them* to listen closely.** Some students in 2-4 will have questions read aloud if they have the  icon in the top left of their screen.

Sit nearby to make sure they stay focused and work hard to show what ***they*** know. When finished - thank them for working so hard **independently!**

Ask the teacher for help with technology or administration if you are unsure of something!

You **CANNOT** choose answers for them on the test. This test must reflect your child's current understanding.

You **CANNOT** translate, define, or rephrase words and questions on the test. It is ok if your child doesn't know the meaning of a word yet. That informs your child's teacher of how to best support them during instruction!

You **CANNOT** use additional resources to support, such as: phones, dictionaries, calculators, etc.

You **CANNOT** Read-Aloud

If your 2nd-4th grade child does not have the  icon in the top left of the screen, please **do not** read aloud the questions or answer choices for them.

You **CANNOT** turn off your  camera in the Teams call. If your child's teacher cannot see you, they have to **pause** the test and you won't be able to proceed until the teacher can see you again.

You **CANNOT** take this test in a language other than English. Please make sure your computer is not set to any other language than English. We will help you change this if necessary.

Please know that failing to adhere to these guidelines could result in your child not getting the proper supports and resources they need!
