

## Quick Start For Students Using an iPad

### Parent or Caregiver Support Required for K-2 students using an iPad

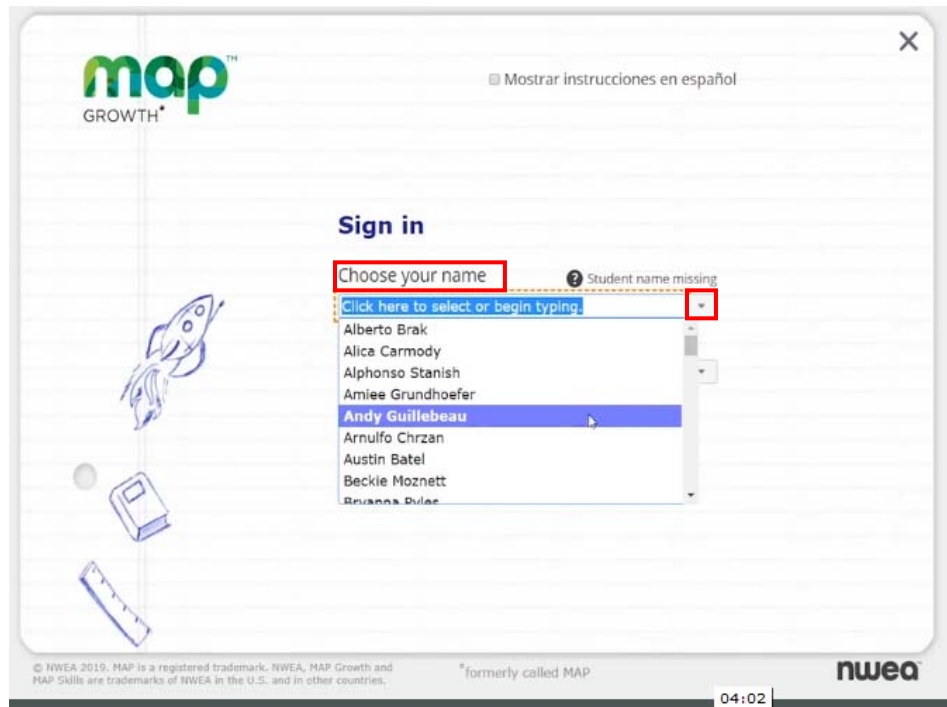

1. Students testing on an iPad must use the NWEA App from the App Store Once the App is loaded, the student would need to click on the NWEA App Icon to launch the login page

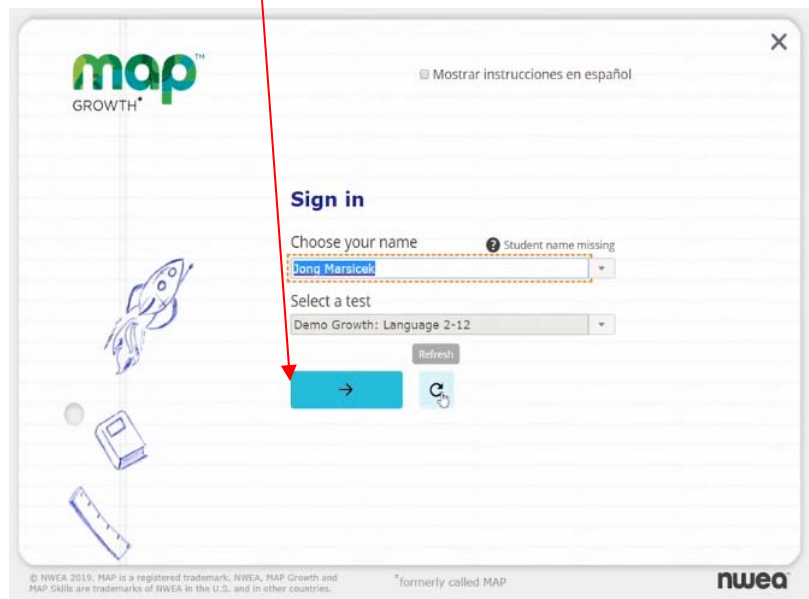

2. Login using the test session name and password given to you by your teacher and then click on the white arrow in the blue box, see picture below.

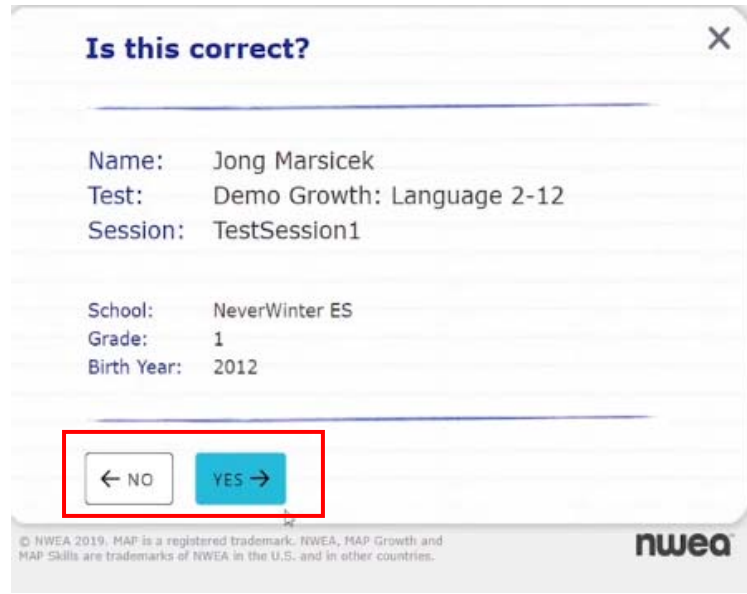

3. Next you will need to select your name from the list of students by clicking on the arrow to the right of the box labeled, "Choose your name," see picture.

4. After you have selected your name, click the blue arrow, see picture.

5. You will see an **“Is this correct?”** page. Click on the blue **YES box** if it shows your name and go to step 6. If you don’t see your name, click on the **white No box** and the page will go back so you can find your name; then repeat steps 4 and 5.

6. You will now see a screen that tells you to wait for the proctor, see picture.

7. Once your teacher has activated your test, you will see this message. Click on the blue arrow to get started.
