VDTS Log Scaling

LANDMARK
Spatial Solutions, LLC

In today's tech-driven world, every industry relies on technology for daily operations. With the onset of the Digital Age and a new generation entering the workforce, technology has evolved to a crucial resource that enhances the work environment. It also acts as a bridge across a multi-generational workforce, helping employees of various ages work harmoniously together.

The VDTS platform exemplifies a **hybrid approach** to log scaling. Built on Android, it is compatible with any **Android** device and works with traditional **handheld** devices, as well as devices that support **hands-free, voice-driven** technology.
