3shape Level 1 Training:
A Complete Introduction to Scanning & Software Navigation

Ajay Huynh
Dental Technology Trainer

| Course Director

LEVEL 1

3 CEU
HALF-DAY LECTURE

PROGRAM OVERVIEW

Digital dentistry begins with mastering the fundamentals of intraoral scanning. This introductory 3Shape Level 1 course is designed for clinicians who are new to digital workflows and want to build a strong foundation with their scanner. Participants will learn essential concepts such as understanding scanner features and warranty information, establishing predictable and efficient scan patterns, and navigating the 3Shape software with confidence.

Proper sterilization and maintenance of the scanner and tips will be reviewed to ensure safe and consistent clinical performance. The course will conclude with an interactive FAQ session, allowing attendees to address common challenges and gain practical guidance. By the end of this program, participants will be equipped with the core skills needed to begin their digital scanning journey successfully.
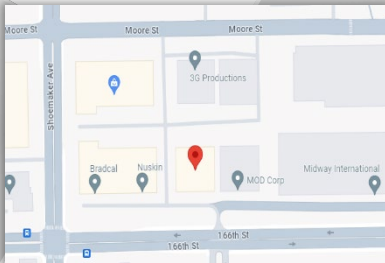

COURSE OBJECTIVES

- Gain a clear understanding of the 3Shape scanner, its features, and warranty essentials

- Learn predictable and efficient scan patterns— including key tips and tricks for accurate results

- Develop confidence in navigating and utilizing the 3Shape software for everyday clinical workflows

- Understand proper sterilization protocols for both the scanner and scanning tips to ensure long-term performance

- Participate in a comprehensive FAQ session addressing common challenges and practical solutions

LEVEL 2

3 CEU
HANDS-ON LECTURE

PROGRAM OVERVIEW

Building on the fundamentals learned in Level 1, this 3Shape Level 2 Hands-On Training course is designed for clinicians who are ready to deepen their practical skills and gain real, chairside experience with digital scanning. This program provides a focused, step-by-step approach—from preparing the scanner and computer, to establishing proper infection-control protocols using gloves and alcohol, to performing live intraoral scans on an actual participant.

Attendees will have the opportunity to work directly within the 3Shape software, explore key functions, and practice capturing high-quality scans with instructor guidance. The session will conclude with saving and sending the completed scans, ensuring participants understand the full workflow from start to finish. By the end of this hands-on course, clinicians will be equipped with the confidence and practical skill needed to integrate digital scanning seamlessly into their daily practice.

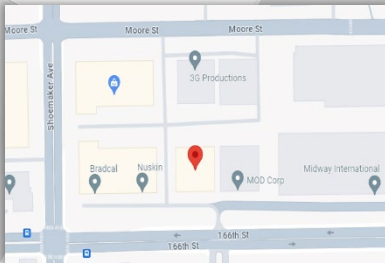

COURSE OBJECTIVES

- Review key functions of the 3Shape software essential for hands-on scanning
- Properly set up the scanner and computer to ensure a smooth workflow
- Apply correct infection-control protocols using gloves and alcohol before scanning
- Select a person for scanning
- Save, export, and send completed scans to complete the full digital workflow
