

WBPC presents Wednesday Night Live

A program to create strong community connections

Description of program

What: Western Boulevard Presbyterian Church (WBPC) hosts ~20 community meals with programming a year. These are occasions to *connect, reflect, play, serve, and eat* (delicious food!) together. These are opportunities to *get to know and love your neighbors*, both by showing up to participate in social events as well the option to take part in an activities designed to build up others and bring joy.

Cost: Free

(Optionally you can bring some canned foods or donate \$ for food pantry to support those in need in our community!)

Who: ALL ARE WELCOME!

When: Wednesday nights from 5:45-7:00 pm

(We host winter/spring and fall sessions; each season lasts ~10 weeks. WBPC takes summer and winter holiday breaks).

Where: 4900 Kaplan Dr, Raleigh, NC 27606

(The Fellowship Hall of Western Boulevard Presbyterian Church. This room is located in the Education building on the lowest floor. It is the building furthest away from Kaplan Road and the building closer to I-440 and a large green field).

Why: This programming is one way we carry out our mission statement of living to share God's love for ALL and to work towards our vision of having a vibrant community church that reflects the Kingdom of God.

Additional special programming: WBPC also hosts a series of community breakfasts, luncheons, Vacation Bible School that all are invited to attend.

Note: Weather permitting, there is an optional playground meet-up for families with kids who want to connect from ~5:15-5:45 pm just before the WNL programs. Text or call Gracey Vaughn at 336-317-1120 if you have questions about whether there is a playground meet-up since they are ad hoc.

Note: we would rather you come no matter what even if you cannot RSVP. However, if you can RSVP by two days before the event by using Sign-up Genius links that will be provided by a newsletter and/or Facebook invite or by emailing fellowship@wbpresbyterian.org, it is greatly appreciated as it helps us more effectively plan and manage resources.
