We have been reading and discussing Decolonizing Wealth by Edgar Villanueva. Systemic racism is part of everything including philanthropy. We have learned a lot about the power of money including ways our money could be used to do better. Here are some ideas:

Form relationships with people in organizations you support

Seek out organizations doing good that are led by persons of color

Recognize that our way is not always the best way and is never the only way

Below are some local groups led by persons of color that you might consider supporting:
