

IMJIN PARKWAY WIDENING & ROUNDABOUT PROJECT

INTERAGENCY TASK FORCE MEETING NOTICE

MEETING CANCELLATION

FROM OUR JULY 15, 2023, KICK-OFF EVENT Mayor Delgado's "Top Ten List Reasons Why We Want to Celebrate the Launch of this Project."

10. This roadway will serve as a much-improved connection for 12 million cars and bikes each year between the Salinas Valley and the coast. As long as the 12 million don't try to use this road in one day!

9. This road will be safer for commuters and local traffic. With its raised median the chances of head-on collisions and fatalities are reduced.

8. It's environmentally friendly roundabout upgrades at 4 intersections. Roundabouts have a positive impact on the environment. Less idling and wait time compared to signalized intersections leads to lower emissions. Less stops and starts decreases air and noise pollution while increasing fuel efficiency. What more could you want from roundabouts?

7. Well there is increased safety with roundabouts due to better flow and faster travel times even with lower speeds thru intersections due to roundabouts.

6. Roundabouts give a higher quality of experience for drivers due to better flow and faster travel times even with lower speeds thru intersections due to roundabouts.

5. There is less maintenance and cost at roundabouts as compared to traffic light intersections.

4. Buffered Class 2 bike lanes, one on each side of the Parkway, for the more serious bicycle commuters with much improved safety for them as compared to now.

3. Class 1, separated rec trail for bikes and pedestrians that connects to existing rec trails and sidewalks all the way to the beach.

2. Partner opportunity to build teamwork between TAMC, City of Marina, private firms such as MPE, and elected officials who appreciate where county and statewide tax dollars from SB1 and Measure X are going.

1. And finally my number one, so we can say thank you today to everyone here and engaged in this project and wish for a safe and successful 2-years of construction so cyclists, pedestrians, and folks driving cars, etc., can live safer and enjoy our beautiful community.

We will keep you updated on our next ITF Meeting
