

Driving individual philanthropy as a trusted advisor

COVID Wave 2 in India is grimmer, starker, and more damaging than the Wave 1

Higher risk of infection spreading far & wide

Wave 2 Cases are 3X more than in Wave 1

Greater burden on health systems

Shortage of hospital beds and oxygen as India battles second Covid-19 wave

The particled hunt for hospital beds is a recurring theme across India as it battles its second wave of Covid-19 infections, mixto sources.

Re-disruption of economic cycles

Covid-19 Second Wave: Small Businesses Stumble Through Maze Of Local Lockdowns

From a market perspective high beta sectors like autos, financials select consum discretionary plays will be impacted. Photo: iStock

Amidst this chaos, citizens are stepping up to support each other

Financial support

In-Kind support

Mental support

People are willing to do more but are confused on how they can help

Today, we want to talk about how you can help your clients do more...

Individual donors are overwhelmed today with options

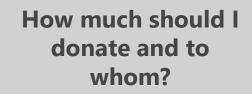

Multiple requests for donation on social media or from community members

Retail donation sites have many options as well

How much impact is created through my funds?

How should I plan my donations and build a philanthropic portfolio?

How should I evaluate the various options?

Which areas should I support and where?

Some advice which you can pass on as their trusted advisor

Here are some impactful giving principles for your clients

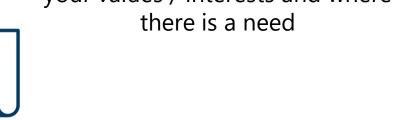

How much?

Depends on the capacity to give; 2% to 5% of income can be explored without it being overwhelming

Which areas?

Support causes which align with your values / interests and where there is a need

How to build a portfolio?

Balance relief work with long-term systemic change such as support oxygen supply but also invest in improving the healthcare system.

How to evaluate?

Select organisations that are credible, capable and align to your values; use data and evidence to inform decisions wherever possible

Which interventions can your clients support?

What is the need of the hour?

THE IMMEDIATE PRIORITY

THE LURKING PROBLEM

SYSTEMIC ISSUES

Virus is more infectious and virulent, spreading far & wide

SAVING LIVES

Oxygen, drug, bed shortage along with rising cases has burdened health systems; **LIVES** of millions at risk and need to be rapidly vaccinated to BREAK THE CHAIN

Lockdown & micro-containment are being employed to contain the spread

SAFEGUARDING LIVELIHOODS

Depleted savings, restricted credit cycles the slide this time could be precipitous, especially for the local small, nano & micro businesses, daily wage earners, contract labour etc.

Other areas crucial for developmet of society have suffered setbacks

REBUILDING INDIA

Critical developments achieved in areas of education, maternal and child healthcare, and environment have suffered a setback due to the pandemic need to make sure that we DON'T SLIP FURTHER BACK

	Immediate	Short Term	Medium Term
Saving lives	O2 concentrators and bedsVaccinationsIncreasing temporary capacity	Health Insurance and Savings	 Health infrastructure Capacities of medical workers and pharmacists
Safeguarding livelihoods	 Survival support Access to govt. schemes and entitlements Access to working capital 	 Skilling support Entrepreneurship support (access to capital + capacity building) 	 Financial inclusion Digital inclusion Formalized labour practices
Education	Support operations of school	Remedial education	Blended learning approach
Environment		 Segregation of waste Behaviour change, awareness and communication 	Strengthening local waste management systems

Unique blended finance instruments can facilitate recovery & resilience

Saving Lives: Immediate solutions

Facilitate the provision of oxygen concentrators and additional beds to hospitals and COVID medical centers

Vaccinations

Support vaccination camps which are focused on people from marginalized communities

Increasing temporary capacity

Provision for necessary medical equipment, mobile hospitals and tele-ICU to increase India's capacity to combat COVID

Saving Lives: Short to medium term solutions

Health Insurance and Savings

Propagate healthcare insurance and savings to people from marginalized communities

Healthcare infrastructure

Support the strengthening of healthcare infrastructure to build the country's resilience

Capacities of medical workers and pharmacists

Support programs which work towards building the capacity of medical workers as well as pharmacists in India

Safeguarding Livelihoods: Immediate solutions

Survival support

Provide immediate financial support to help workers sustain their families and travel back to resume their jobs

Access to govt. schemes and entitlements

Support programs that focus on unlocking access to eligible govt schemes and entitlements

Access to working capital

Provide returnable grants and or low cost loans to people from lower income backgrounds

Safeguarding Livelihoods: Short to medium term solutions

Skilling and entrepreneurship support

Provide access to capital, skilling and mentorship programs, job opportunities as well as unlock market linkages

Financial and digital inclusion

Facilitate financial and digital inclusion of workers / entrepreneurs across the country

Formalize labour practices

Advocate for formalized labour practices which can provide security to labour across industries

Education: Immediate to medium term solutions

Support operations of schools

Build capacity of schools (with online facilities) to deliver quality education; provide necessary equipment to schools with no / less tech facilities

Remedial education

Provide extra classes / tuitions to students who are weak in studies or are slow-learners.

Blended learning approach

Facilitate the integration of digital classes and modules within the schools curriculum and calendar

Environment: Immediate to medium term solutions

Segregation of waste at source

Educate communities on proper disposal of waste – wet and dry; within dry, waste can be segregated as cloth, metal, plastic

Behaviour change and awareness

Propagate good waste management practices, waste disposal, and community level waste treatment options

Strengthening local waste management

Work with municipal bodies, local government agencies to strengthen waste management systems

There is a surge in individual philanthropy

You can help your clients make more informed decisions

Use the principles of impactful giving

Direct resources to immediate measure to combat COVID

Plan for sustainable giving to medium term interventions

Thank You
