Temporary limits placed on portion of road west of Dubois

Cody, Wyo. June 24, 2022 — As snow continues to melt off some mountain roads, the Wind River Ranger District of the Shoshone National Forest is limiting travel on the portion of Forest Service Road 515, Barbers Point Road, between Wind River Lake and Brooks Lake Lodge due to remaining areas of snow drifts and heavy mud.

“We made the decision to temporarily limit the portion of Barbers Point Road to ATV and UTV traffic for the time being to lessen the chance of damage to the road as well as the chance of passenger vehicles becoming stranded,” said Wind River District Ranger Jeff von Kienast. “Until conditions improve, this portion of the road will be closed to passenger vehicles.”

To mitigate road damage, it is advised that individuals who travel Barbers Point Road, Forest Service Road 515, on ATV or UTV continue to assess conditions and use extra caution when traveling the portions of the road that are wet.

For more information, please visit the Shoshone National Forest website (<https://www.fs.usda.gov/shoshone>) and Facebook page (US Forest Service – Shoshone National Forest). For information specific to this road limitation, contact the Wind River Ranger District at 307.455.2466.

As America’s first national forest, the Shoshone National Forest has 2.4 million acres of diverse terrain and a mission to sustain the health, diversity, and productivity of the forest to meet the needs of present and future generations.
