

Energy New England (ENE) provides Home Energy Assessments for Block Island Utility District

For Immediate Release: 2020

Contact: Kristin Dupre, Director of Demand Side Management, Energy New England, 508-698-1227 // kdupre@ene.org

Energy New England (ENE) is pleased to offer Home Energy Assessment to the customers of Block Island Utility District (BIUD). ENE provides Residential Conservation Services to 22 MLPs in Massachusetts and Rhode Island. ENE was chosen by Block Island Utility District to provide Home Energy Assessment for both residential and small business customers. ENE will be using SnuggPro software to provide a comprehensive evaluation and engaging report.

The program is scheduled to launch on November 1st. In addition, to residential and commercial energy audits, BIUD will also be offering rebates and incentives to both residential and commercial customers. Information about incentives will be available on the BIUD website,

“The Block Island Utility District is extremely pleased to finally offer an efficiency plan to its customer/members,” stated Utility District President Jeffery Wight. “We have worked hard to develop and fund this program with no impact to overall rates and we encourage everyone to participate so that they can take better control of their overall energy bills.”

“ENE is so pleased to be partnering with Block Island Utility District to provide their customers a terrific service opportunity. It has been our pleasure to be working with Jeff and his team, since the inception of the BIUD and providing them with the support and expertise that ENE has developed over the 22 years of serving municipal utility clients in New England”, said John G. Tzimorangas, President and CEO of ENE.

Customers will be given the option to have an in-home assessment or to have the assessment done remotely using video technology. For in-home assessments the amount of time the auditor spends inside the home will be shortened and we will be following up with call to review the report and recommendations and prioritize a short- and long-term savings plan.

Customers who perform assessment will receive energy saving items such as LED bulbs, smart power strips, and water saving devices that are installed at the time of the assessment. For those customers who choose to have a video assessment, energy saving kits will be delivered at a later time.

Customers can schedule an appointment by calling 888-772-4242 or going the ENE energy efficiency website, www.ee.ene.org.

About Energy New England (ENE): ENE, is the largest wholesale risk management and energy trading organization serving the needs of municipal utilities in the northeast. ENE works with numerous businesses, residents and utilities to help promote the principles of conservation, efficiency, and environmental stewardship, and advances the many benefits available through integrated sustainability planning. ene.org

About Block Island Utility District (BIUD), dba Block Island Power Company: BIUD's core mission is to serve our customers with safe, reliable and affordable electricity. Equally important is to be a member governed, transparent and member/consumer focused electric utility that is enthusiastically leading the transformation of the Island's energy future.
