

All,

This week we'll be digging into the specifics of single ply roofing membranes and learning to spec roofs that just might outlast us. This course is being presented by Brett Wildfong with MWA Commercial Roofing Solutions. His information, along with a description of the course, and the virtual login (Webex) information is below. If anyone has any issues logging in the day of the event, or registering, please feel free to contact me directly and I will do my best to help you out.

### **CEU Course Description**

Single Ply [R]evolution

As the single-ply roofing market has grown, numerous enhancements have evolved; contributing to the effectiveness of this most often applied roofing solution. Selecting the right attachment method, pre-formed accessories and system enhancements are integral to long-term physical and environmental performance. These advancements also contribute to improved roof top safety, installer accuracy and construction speed. Taking specific measures in design, product selection and implementation will result in a modern roof for future times. It also presents new opportunities as the whole building is considered in preference to singular systems.
