2025 Hamilton County Urban Food Systems Convening

CENTERING AGRICULTURE

In 2024 we analyzed food access in Hamilton County. This year, we will take what we learned and begin to ask deeper, more strategic questions. Our goal for the convening is to plot potential connections and partnerships within the food system network to support the development of a local urban agriculture infrastructure that effectively and efficiently provides fresh produce to Hamilton County communities, schools, and businesses.

JOIN THE CONVERSATION

We are seeking members of the following food system sectors in Hamilton County to join us and provide input

- Farmers
- Community Gardens
- Educators/School Districts/Universities
- Government/Policy Representatives
- Grocery Stores/Food Pantries/Markets

Register by Monday, November 24, 2025
