Rachel Chen is an MPH candidate at Columbia Mailman School of Public Health with a focus on Environmental Health Policy. She has a background in Preventive Medicine and Environmental Health Science. Rachel's experience includes research assistant roles and sampling collection training with the Yale WATER study. Currently, she supports CCCEH CEHJ research with a literature review on the health impact of prenatal exposure to air pollution. She also works as a part-time program manager at the Civilience Company, specializing in infectious disease exposure analysis. Her passion lies in developing sustainable environmental policies and promoting environmental justice.
