

Xeno BioForce

Daily Anti-Xenobiotic, Excellent for Long Term Use
90 Veggie Capsules NPN80043173

Patient Reference

Matrix Nutritional Series

Daily Xenobiotic Buffer

Matrix Nutritionals Series was designed as an eclectic offering for the Physica Energetics line of remedies primarily to assist in the "reactivation of the mesenchyme" (Dr. Reinhold Voll), via the nutritional complement pathways. These pathways are present in every system throughout the body and require balanced attention. In keeping with the principles of BioEnergetic Medicine, the remedies nourish and support these systems without punishing them with overstimulation or imbalancing factors, which, ultimately, is counterproductive. This approach has been carefully and respectfully designed to provide the necessary natural (organic where available), synergistic factors in proper energetic and biochemical ratios, to ensure assistance towards yielding a deep and lasting result. They are not to be confused with replacement therapy nutraceuticals that may seem to help for the moment, until the patient stops taking them or the condition is driven deeper. These remedies honour The Legacy of BioEnergetic Medicine, and are known by both patient and practitioner to be exceptionally effective.

Xenobiotics are implicated in all forms of disease and dysfunction in the body. Defined as substances which are foreign to the body, xenobiotics include any and all substances which are harmful to human health and are capable of disrupting natural biological processes, ultimately leading to disease and dysfunction.

We are exposed to xenobiotics every day. They are present in the food we eat, the water we drink and the air we breathe. Some of the most common xenobiotics include pathogenic organisms, synthetic fertilizers and pesticides, heavy metals, food additives and chemicals, electromagnetic radiation, geopathic stress, etc.

The increase in synthetic chemicals, electromagnetic radiation, antibiotic resistant organisms and heavy metals in our environment has led to an overwhelm of the body's ability to cope with daily detoxification of xenobiotics, leading to an increase in the number of illnesses and diseases present today.

Synthetic pesticides are widespread in the environment and are found in most major lakes, rivers and groundwater. They can be found in soils many decades after their use and are taken up by the crops that are grown on the contaminated soil, making their way into our food supply. Pesticide residues can be found in the fatty tissues of the fish, fowl and animal products that we eat, with concentrations increasing further up the food chain. These chemicals have the ability to penetrate cells, disrupting chemical processes required to maintain health and lead to a variety of imbalances.

Research on women golfers has shown a 20% link between pesticide exposure and breast cancer.

Electromagnetic radiation from cellular phones, computers, high voltage power lines and other sources of electrical radiation have been implemented in many illnesses including childhood leukemia, brain and other forms of cancer, Lou Gehrig's disease, depression, thyroid dysfunctions and more. Airline pilots, stewards and frequent fliers have been found to have a greater incidence of various types of cancer, due to cell mutations caused by elevated levels of ionized radiation present at high altitudes.

Xeno BioForce is a powerful phyto-nutritional formula developed to offer support in the presence of daily xenobiotic exposure. Its combination of nutrients and herbs provides support and nourishment to the immune system, increasing the body's ability to fight infection and repair damaged tissues. The synergistic combination of organic or wildcrafted botanicals in *Xeno BioForce* provides broad spectrum support for the organs of detoxification, including the gastrointestinal system, spleen, liver, kidneys and urinary system, respiratory system and reproductive system. This formula supports the health of the mucous membranes and offers deep cleansing at the level of the mesenchyme.

Xeno BioForce is well tolerated by both children and seniors and may be taken on a regular basis particularly during cold and flu season, frequent travel, or in situations and circumstances where potentially infected people congregate - schools, office, concerts, meetings, etc.

Consider Xeno BioForce for use on a daily basis to offset and buffer the xenobiotic burdens of civilization.

Ingredients (per 2 capsules):

Astragalus 100 mg
Beta carotene 3200 IU
Coptis 100 mg
Ginger Root 150 mg

Vitamin C (Ascorbic Acid) 200 mg
Wild Cherry Bark 50 mg
Zinc (Gluconate) 5 mg
