TRS More About our Camps...

Camp Classroom Placement:

Upon completion of registration, TRS staff will place each camper in a group with an appropriate staff to participant ratio based on their needs, age, safety considerations, medical needs and participant's disability as indicated in the registration.

Please Note: participants who require a constant 1:1 support may need more support than this camp structure can provide. If you are unsure if your child will be successful in the program, please call the main TRS office to discuss eligibility.

Medication & Medical Procedures

Summer Camp staff are trained to provide personal care support, administer medication and select medical procedures to campers.

Note: a physician's authorization for each medication and/or procedure that your child may need during camp hours is required prior to your child starting camp. These documents will be provided to you after a completed registration is reviewed by TRS staff.

Transportation:

Therapeutic Recreation offers transportation to and/or from camp provided through a contract with Fairfax County Public Schools. If you choose to utilize this transportation option, the participant's summer site will be determined by TRS based on the participant's pick-up address. If you choose to provide your own transportation, you will have the ability to select the participant's summer camp location. Please see information included in the registration for details.
